Secretary to the Principal

History and Description

MILLERSVILLE STATE NORMAL SCHOOL, the oldest normal school in Pennsylvania, was recognized as a State Normal School, December 2, 1859. This recognition was in accordance with the Normal School Law of 1857. However, five years before this, Millersville Normal as an institution of learning and professional training, had its origin when the "citizens of Millersville and its vicinity . . . erected a building for the purpose of establishing a school, which they proposed to denominate the Millersville Academy." The years between this beginning and the recognition of the school as a State Normal were years of success and progress. In many respects this "First State Normal School in Pennsylvania" became the model of all the others in the State as well as many Normal Schools in states lying west of Pennsylvania. From 1857 to 1917 the business affairs of the School were managed by a Board of Trustees elected by the stockholders and appointed by the State Superintendent of Public Instruction. Since February 24, 1917, the Millersville State Normal School has been owned by the State and managed by a Board of Trustees consisting of nine men appointed by the State Board of Education.

Millersville is a pleasant village, situated four miles southwest of Lancaster city, in the richest agricultural county in the United States. It is also a most beautiful and healthful place for a school. By trolley car, Millersville is just a half-hour's ride from Lancaster, cars leaving Center Square, Lancaster, on the hour and half-hour for Millersville. These cars are easily reached from the Pennsylvania and Reading Railway stations.

The location of the Millersville Normal School is especially favorable to moral culture. It is near enough to Lancaster to enjoy the benefits of a city, and yet not so near as to expose students to the numerous temptations common to cities. There are six churches of different denominations in the village, where students may attend. Millersville is a village of homes. Many families come to live in the village while their children are attending the Normal School.

Grounds and Buildings

The Millersville campus is concededly the most beautiful in the state with its grand old trees, shrubbery, terraces, lake, inviting walks, fountains, etc. The buildings include the ladies' and gentlemen's dormitories, separated by the administration building, library, science building, gymnasium, training school, domestic building, and power plant.

The dormitories are comfortable and commodious, many rooms being *en suite*. Bath rooms (showers), hot and cold water, electric lights and steam heat afford comfort and all conveniences. *Single*

beds for every room will be used entirely next year. Most of the rooms are now thus equipped. Enough stairways are provided to furnish prompt exit if necessary, and a large chemical engine is ready for immediate service at all times. The gymnasium, library and science building are thoroly equipped with all needed supplies.

Physical Health

The health of the students is looked after very carefully. Excellent food and in sufficient quantities is provided and milk for drinking is furnished at morning and evening meals.

A *practical nurse* is in the building at all times to respond to calls and the services of physicians can always be secured. Should a special emergency arise two well equipped hospitals in Lancaster are within easy reach.

Instruction

Every instructor in this school is a graduate of some well-known technical school, college, or university, and a specialist in his or her own line. Opportunity is afforded for study according to the latest and most approved methods. Millersville has always been noted for its strong faculty, and during its long history the school has enjoyed the distinction of numbering among its faculty many authors of note.

Moral Health

The moral health of the student body is carefully guarded. Y. M. C. A., Y. W. C. T. U., Y. W. C. A., Bible classes and Sunday evening services offer opportunities for moral and spiritual growth.

Scholarships, Prizes, etc.

Alumni Loan Fund

The Alumni and other friends of the School have established a fund, which is lent to deserving students without interest to enable them to complete their course. The fund amounts to nearly \$1,500, and its benefits have of necessity been confined to members of the Senior class. Contributions to the fund will be thankfully received. Address H. C. Symons, Millersville, Pa., treasurer of the fund.

Scholarships

A free scholarship was established by the students of the School during the administration of Prof. James P. Wickersham as principal. It is designed to honor the memory of this distinguished educator, and is entitled the Wickersham Memorial Scholarship. It is awarded at the close of each school year by the faculty and State Board of Examiners to a student who has completed the "Final" examination for entrance to the Senior class and who is entitled to the benefit of State Aid. It includes boarding and the use of text-books, rent free, for the Senior year. The basis of selection is scholarship and moral character.

The sum of \$1,000 has been subscribed by the Class of 1898, the interest of which is used annually in assisting to pay the expenses of a meritorious student. This scholarship is awarded at the close of each school year to the student who ranks second in his work preparatory for entrance to the Senior class and is payable after graduation.

Prize for Excellence in Mathematics

The Class of '66 has invested, in perpetuity, the sum of \$500, the income of which shall be awarded to two students (one lady and one gentleman) who excel in mathematics. This prize is awarded to members of the Senior class at the end of the school year.

For Debating and Public Speaking

Class of '95 prize, for oratory. The interest of \$100. Open to members of the Junior class.

Literary and Social Life

Two literary societies, the *Normal* and the *Page*, afford excellent training in public speaking, music, debating, etc. Every student should join one of these societies.

Social education is not neglected and various affairs of a social nature are conducted during the school year, all conducive to the development of social poise and correct deportment.

Lecture and Entertainment Course

An unusually attractive entertainment course has been engaged for the year 1921-22. Students are admitted free to all numbers.

Athletic Activities

Millersville Normal has an enviable record for all athletic activities: both young men and young women participate in these sports under skillful guidance. The athletic carnival is one of the big events of the year.

Regulations for Students

1. Rooms may be engaged by writing to the Principal. All students are required to room in the school building or in private houses designated by the School. No one is permitted to room or board out of the school building until all the rooms are occupied except for special reasons, and by previous permission of the Principal.

2. Rooms are supplied with furniture, rugs, and bed-clothing, *except blankets which students are requested to bring with them*, and will be ready for occupancy on the first Tuesday of the session. Rooms should be vacated not later than the day following the close of school. All keys must be returned to the book-room at the close of the second semester. *After the breakfast following the closing day before vacation, those who remain will be charged regular vacation rates.*

3. Rooms engaged and not occupied by the first evening of the term may be forfeited. Rooms will be assigned to new students in the order of their application and entrance as far as practicable. To have a room re-served the semester fee (\$10.00) *must be paid when reservation is made. In case a student cannot come to school, this fee will be refunded if the Principal is notified not later than the Saturday before the opening of the term for which the room is reserved*

4. Students will furnish their own blankets, towels, soap, and napkins and must have all articles of clothing plainly marked with indelible ink with the full name. Each student is entitled to have fifteen pieces washed weekly without extra charge. He will be charged for additional pieces. Electric light is furnished by the school, and other lights are not permitted.

5. Students must have their rooms in good order and ready for inspection by 9 A. M.

6. A student's first duty is to report at the public office for enrollment. Here his program is arranged. After this all classes must be entered promptly. Every student shall be present at all general exercises in the chapel, unless excused.

7. *Inasmuch as frequent absence from school for any reason hinders the progress of study, permission to leave school will not be granted*

without good reason for such absence. Week-end visits are not permitted unless the parent writes to the School requesting such permission and a written invitation is sent to the School by the parent in whose family the student desires to visit.

8. Unless properly excused, students are required to take regular exercise in the gymnasium under a trained instructor. For this purpose they are expected to provide themselves with suitable clothing, including shoes. Ladies should bring a proper gymnasium suit, preferably black serge, consisting of bloomers and waist. Shoes and bloomers may be obtained in the book-room. Rubber soled shoes are not advisable for general gymnastic work.

9. All athletic games and contests and all public exercises are under the general control of committees of the faculty. No student can take part in any public game or contest unless he is a *bona fide* student whose conduct and standing in class are satisfactory.

10. It is expected that the ladies and gentlemen of the School will treat one another with politeness, and in accordance with the usages of good society.

11. Ladies will not be permitted to have gentlemen, not relatives, visit them except by permission from the Dean of Women.

12. Except for special reasons, no visiting will be permitted on Sunday or in the evening. Permission to receive visitors shall be obtained before the visitors come to the school. Prolonged visits always interfere seriously with the progress of a student in his studies, and should not be made except for urgent reason and by previous arrangements for boarding, etc. Visits to students by any one during the school hours of the day or evening seriously interfere with their work, and should not be made unless necessary. The best time to visit students is Saturday afternoon. Young persons visiting students will be expected to conform to the regulations of the school. Children under twelve years of age will not visit students except by previous permission.

13. *All visitors are charged 35 cents per meal, and 50 cents for a room, or \$1.50 for a full day.*

Business of the School

The tuition of all students at the State Normal School is free to those that can offer fifteen units of high school work. All others will be required to pay tuition at the rate of \$2.00 per week until such time as the entrance requirements are satisfied. Students receiving free tuition must also agree to teach for two years in the public schools of this Commonwealth.

A semester fee of \$10.00 will be charged each student, payment of which will secure reservation of room.

Day students will pay an additional fee of \$5.00 each semester for day student privileges.

No deduction will be made to any student entering within the first two weeks or leaving within the last two weeks of any semester.

No student will be admitted to classes without making a payment on account.

The following table gives a concise statement of the charges for each semester, including semester fees:

REGULAR CHARGES

	First Semester 18 Weeks	Second Semester 18 Weeks
Boarding Students presenting 15 units.....	\$136.00	\$136.00
Boarding Students not presenting 15 units.....	172.00	172.00
Day Students presenting 15 units.....	15.00	15.00
Day Students not presenting 15 units.....	51.00	51.00

CHARGES FOR SPECIAL LESSONS, ETC.

	First Semester 18 Weeks	Second Semester 18 Weeks
Instrumental Music or Voice Culture.....		
Two lessons weekly, two practice periods daily...	\$36.00	\$36.00
One lesson weekly, one practice period daily....	18.00	18.00
Two lessons weekly, without use of instrument...	30.00	30.00
One lesson weekly, without use of instrument....	15.00	15.00
Use of piano, one practice period daily.....	3.00	3.00
Use of piano, two practice periods daily.....	6.00	6.00
Typewriting, one period daily with use of typewriter.	10.00	10.00
Stenography, daily lessons in class.....	10.00	10.00
Penmanship, (special lessons in class daily).....	10.00	10.00
Chemical laboratory, charge for breakage, etc.....	2.50	2.50
Agriculture.....	.50	.50
*Home Economics, laboratory fee.....	.50	.50
Industrial Arts.....	1.00	1.00
*Manual Training, laboratory fee per course.....	1.50	1.50
Physics.....	.50	.50
Zoology.....	.75	.75
Dinner, five school days.....	31.50	31.50

* Students will be charged cost price of materials used in making models and carrying out projects.

Students desiring to room alone may do so when the building is not full, for \$1.00 a week additional.

Boarding students absent from school for two full consecutive weeks on account of *personal illness* are granted a reduction of \$4.00 per week for each full week absent.

Payment

All moneys must be paid to the Bursar who acts on behalf of the Trustees.

The following shows the amounts exclusive of the semester fee of \$10, and the dates on which payments should be made by boarding students receiving free tuition.

Sept. 20	\$80.00
Nov. 28	46.00
Jan. 30	80.00
Apr. 28	46.00

A student's account (including books and stationery) must be settled at the end of each semester. No student will be promoted, granted a withdrawal card, recommended to the State Board for examination or second diploma until all bills have been paid.

Checks, bank drafts, express, and post-office money orders may be used in payment of all bills. They should be drawn payable to Millersville State Normal School.

There are no extra charges except for books and stationery and extra branches named above.

The extra expenses of students are very small, consequently they do not need large sums of spending money. Arrangements are made by which students may deposit money with the Bursar, and draw it at such times as they may desire.

Mail, Telegraph, etc.

The School has three mails daily. Mail matter should be addressed: *Millersville, Lancaster County, Pa.* The words *State Normal School* on the envelope of a letter or package will facilitate its delivery.

Write the name of the post-office, *Millersville*, plainly. Mail matter frequently fails to arrive promptly because it is directed to Millersburg or Millerstown or Minersville, instead of *Millersville*.

All telegrams addressed *State Normal School, Millersville, Pa.*, will be sent to the School by telephone from Lancaster.

Both telegraph companies—the Western Union and the Postal—have printed directions to this effect in their books of instructions to agents.

The School is connected by telephone with nearly all parts of eastern and central Pennsylvania.

Arrangements for Trunks

Tickets should be bought and baggage checked to Lancaster, Pa. Students entering on the opening day should bring baggage checks to the school and hand them to the Matron or Dean of Men. This will ensure their being brought out by truck. Students arriving at Lancaster at any other time should see that their baggage is brought out on the trolley car on which they arrive. Station and baggage agents will give full information. Students arriving in Lancaster, over the Reading, will take a C/A car a half square from the station and at the public square take a Millersville car marked M/V. These cars pass the corner diagonally across from the Pa. station.

**Millersville issues a very beautiful book of views. A copy may be had on request.*

Report of Committee on Revision of Normal School Course of Study

Adopted May 10, 1921.

Requirements for Admission

1. Graduates of approved secondary schools who can present evidence of having completed fifteen units of high school work will be admitted as regular students to the state normal schools.

2. A unit shall consist of not less than thirty-six weeks of work requiring at least four periods per week of not less than forty minutes per period or its time equivalent. (Subjects not requiring out-of-class preparation or study shall require double time in estimating units.)

3. Credentials of all students entering the state normal schools shall be received and evaluated by the normal schools and submitted to the State Department of Public Instruction for approval.

4. Adequate knowledge of the subject matter in the elementary subjects will be presupposed on the part of all students admitted to the normal schools.

5. Required units for admission:

English, 3 units.

Mathematics, 1 unit.

Science, 1 unit.

Social Studies, 1 unit, after Sept., 1923, 2 units.

Elective, 9 units, after Sept., 1923, 8 units.

6. The holders of permanent and professional certificates will be given one unit credit toward admission as regular students to the normal schools for each subject of high school grade written on the certificate.

7. Advanced credit will be given for equivalent courses in approved teacher training institutions.

8. For the present the normal schools shall, when necessary, conduct a secondary department of first-class high school grade for those students who do not have similar high school facilities available in their home communities.

Curricula of the Pennsylvania State Normal School

Students Must Select One of Four Curricula

The four curricula that are offered to students have been organized upon the principle that teaching in the elementary schools can be classified into sufficiently definite types to require specialization. Each curriculum prepares for a specific type of teaching position.

The two years' work of the normal school is divided into four semesters. The work of the first semester is the same for all students. A large purpose of the work of the first semester is to acquaint students with the requirements for successful teaching in the different grades so that they may be able to decide intelligently in what grade or grades they prefer to teach. The course entitled "Introduction to Teaching" which includes observation and participation in the training school is especially designed to aid students in a wise selection of a curriculum.

At the end of the first semester students are asked to select one of the four curricula for the purpose of specializing in a specific field of teaching. The work of each curriculum must be completed in its entirety. Students may be granted the privilege of changing from one curriculum to another only on condition that the prescribed courses of any curriculum so selected must be completed before a certificate of graduation is granted.

The Four Curricula

- Group I. Kindergarten—Primary—for teachers of Kindergarten and grades 1, 2 and 3.
- Group II. Intermediate grades—for teachers of grades 4, 5 and 6.
- Group III. Grammar Grades and Junior High School—for teachers of grades 7, 8 and 9.
- Group IV. Rural—for teachers of rural schools.

Electives of three semester hours' credit may be offered in each semester for capable students.

Major and minor electives shall not include more than three semester hours in the special subjects for which separate curricula are provided in the State Normal Schools.

Electives

All electives are taught from the professional point of view and are of college grade of work.

All electives are to be chosen with special reference to the group in which the teacher is preparing to teach and with the approval of the principal of the school.

Each normal school is required to offer at least one elective in each of the six groups of electives. Additional electives of similar grades may be offered at the discretion of the principal of the school.

Brief Description of the Courses of Study

The State Course of Study

The state course of study is used as the basis for the courses in the teaching of the elementary school subjects.

Classification and Numbering of Courses

All courses are classified in seven departments. All courses numbered below 10 are common to all groups. A decimal indicates that two or more courses of the same department occur in the same semester. A single digit or the last of two digits indicates the semester in which the course occurs. The first of two digits indicates the group in which the course occurs.

Education

Education 1—Introduction to Teaching

All groups, 1st semester. 4 periods, 3 hrs. credit.

The primary purpose of this course is to aid students in selecting a specific curriculum at the end of the first semester, and to imbue them with a strong professional spirit and high standards of professional ethics. It includes consideration of the different types of teaching service, the general aims of the public schools and, more specifically, the work to be accomplished by the primary, intermediate, junior high and rural schools respectively, a brief sketch of the characteristics of children in these different types of schools and the qualifications required of teachers to meet the needs of children at the different age levels in these different types of schools. The broad social aims of each type of school and its relation to the state are emphasized.

The instruction in this course is closely correlated with frequent visits of observation and participation in the training school.

Education 2—Psychology and Child Study

All groups, 2nd semester. 3 periods, 3 hrs. credit.

This is an elementary course in psychology combining the important topics of both general and educational psychology, and forming the basis of the specific courses in educational theory and practice. The chief topics considered are: (a) instinctive tendencies; (b) habit-formation; (c) memory, association (including localization of functions), and economy of learning; (d) the effective life; (e) the thought processes; (f) the extent and causes of individual differences among children, and the use of intelligence tests in determining them; (g) the treatment of exceptional children. About one-third of the course is given to the study of the characteristics of children at the different levels of growth. One laboratory period each week is given to the observation of children. While this course is practically identical in all curricula, there is differentiation in the observation of children and in the laboratory experiments, each group emphasizing the characteristics of children at the age level of its particular curriculum.

Education 12—Kindergarden Theory

Group I, 2nd semester. 2 periods, 2 hrs. credit.

This course deals primarily with kindergarten aims, purposes, technique, and equipment. Special attention is given to modern tendencies in kindergarten practice, and particularly to the relation of the kindergarten to the primary grades. Observation and participation in the training school is a prominent feature of the course.

Education 13—School Efficiency

Group I, 3rd semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teaching, deriving a large part of its meaning from the teaching experience of the student. The instruction is shaped by the aim and purposes of the kindergarten and grades one, two and three, and includes such topics as: classroom routine, the organization of the daily study and recitation program; hygienic standards for and care of classrooms; the making and keeping of records; and is followed by the analysis and study of such class-room technique as: the significance of the play spirit in the primary grades; the management of primary grades; the use of seat work; the value of dramatic expression; types of class-room exercises applicable in the primary grades; and the project and problem method as applicable to children of this age; and the practical application of educational tests and scales.

Education 23—School Efficiency

Group II, 3rd semester. 3 periods, 3 hrs. credit.

This course correlates closely with the student teaching, deriving a large part of its meaning from the teaching experience of the student. The instruction is colored and shaped by the purposes and nature of the work in the intermediate grades and includes class-room routine; the daily study and recitation program, hygienic standards for and care of class-rooms; the making and keeping of records; and is followed by the analysis and study of such class-room technique as: methods of lesson assignments; types of class-room exercises; efficient methods of study; types of questioning; the value and uses of intelligence and educational tests; and the project and problem method as applicable to the fourth, fifth and sixth grades. The problem of discipline in these grades receives attention.

Education 33—School Efficiency

Groups III, and IV, 3rd semester. 3 periods, 3 hrs. credit.

This course deals with the principles of instruction common to the teaching of all subjects in the seventh, eighth and ninth grades and in one room schools and is closely correlated with student teaching. Consideration will be given to such topics as types of lessons, the recitation, the assignment, the question, the project and problem method, the socialized recitation, lesson plans, supervised and independent study, the use of educational tests and scales, problems in discipline, economy in class-room management. A considerable part of the time of this course is devoted to a discussion of educational guidance problems. The course

analyzes the processes and problems of the important types of human occupations, the aptitudes and training required for each, the financial rewards, the hazards, the opportunities and avenues for advancement in each field. As far as possible typical occupations are studied at first hand including occupations of agriculture, manufacture, transportation, exchange, public service, professional service, domestic and personal service, and clerical occupations. The pertinent printed matter in books, pamphlets and magazines is examined and organized.

Education 43—The Teaching of Primary Subjects

Group I, 3rd semester. 3 periods, 3 hrs. credit.

This is a composite course including the best modern primary methods in number, geography, history and handwork. It is devoted to a consideration of environmental materials in geography and the development of correct geographical concepts; to the aims and purposes of history in the primary grades and the materials available for these grades, with emphasis on the selection of materials for patriotic and other special days; to the best methods of inculcating in children simple health habits; and to the best available means of seat work through paper cutting, weaving, clay modeling, etc.

Education 4—History and Principles of Education

All groups, 4th semester. 3 periods, 3 hrs. credit.

This is an integrating course and aims to bring together and interpret the details of educational theory and practice represented by the preliminary courses, and to leave with the student a unified body of educational doctrine. The course begins with a brief review of the origin and development of present day practices and tendencies in public school education, the large emphasis being placed on those movements that have originated, or at least have come into prominence, since the time of Rousseau. The discussion of such topics as: the aims and purposes of education; the development of various conceptions of educational values; and the history and present status of such educational movements as: vocational education; the treatment of backward children; scientific measurements; the junior high school; the doctrine of interest; formal discipline; the transfer of learning; project and problem teaching; and the socialized recitation.

Education 3—Student Teaching and Conferences

All groups, 3rd semester. 12 periods, 12 hrs. credit.

THE TRAINING SCHOOL. The training school is the pivotal point of all the work of the normal school. It functions as a laboratory for every department of the school and articulates with peculiar intimacy with the Department of Education.

OBSERVATION AND PARTICIPATION. Although student teaching is confined to the senior year, junior students are given frequent opportunities for participation in the work of the training school, and observation of expert teaching in the training school is a feature of all the courses in education and of many other courses throughout the curricula. One critic teacher is assigned to each two class-rooms and demonstration lessons are taught from time to time in exemplification of the various phases of good educational practice.

DISTRIBUTION OF TIME. A minimum of two consecutive sixty-minute periods per day for one semester is given to student teaching. Where two student teachers are assigned to the same class in the training school the assignments are so adjusted that each student teacher has a definite problem. The distribution of teaching time is designed to give progressively to the student an increasing class responsibility.

LESSON PLANS. Plan forms are used upon which all lessons taught by student teachers are planned. Critic teachers hold daily conferences with the student teachers under their charge and approve all lesson plans of student teachers before the lessons are taught.

STUDENT TEACHERS. Every studentteacher confines his teaching to the grades of the group which he has elected. Student teachers electing group I and group II have practice experience in all the subjects of the curriculum and, if possible, in all the grades of the group. Student teachers electing group III confine their practice teaching largely to the subjects in which the student has elected to specialize and, if possible, have practice teaching in all the grades of the group. Student teachers electing group IV confine their practice teaching largely to the rural one-room ungraded school and have opportunity for contact with the community problems. All assignments for student teachers contemplate the completion of a unit problem.

TRAINING CLASSES. Training classes aim to have not less than twenty nor more than thirty pupils; that is, enough pupils to set up a normal social situation and yet not so many as to tax unduly the limited skill of the teacher.

THE PUPILS. The pupils in the training school by reason of the careful planning of each lesson and the close supervision of expert teachers, as well as through the use of abundant and elaborate equipment of the normal school, are most favorably situated to secure the best possible education.

English 1—English Fundamentals

All groups, 1st semester. 3 periods, 3 hrs. credit.

The purpose of this course is to acquaint the student with the source of material in English and the forms of correct expression.

A definite standard of written and spoken English must be acquired and maintained by all students. Further work in English without extra credit will be required of all who fail to reach and maintain this standard.

A few periods of instruction are given in the method of classifying and cataloguing books and in the use of reference books, readers' guides, etc.

About a third of the time of the course is devoted to a thorough review in the basic principles of English grammar and special attention is paid to the structure of sentences and the syntax of their various parts. The course includes a brief history of the language and the principles underlying its development.

About a sixth of the time of the course is devoted to a study of words including pronunciation, diacritical marking based on a generally recognized system of phonetics and attention is paid to basic principles in etymology.

English 1.1, 2.1—English Composition

All groups, 1st and 2nd semesters. 2 periods, 2 hrs. credit each semester.

This course includes a thorough study of the forms of English prose composition together with much practice in writing. The four types of English prose: narration, description, exposition and argumentation are carefully studied and analyzed with reference to form content and technique. Special attention is given to the essay and the short story as media of prose expression and students are required to write frequent themes illustrative of the various prose forms discussed. These are made the subject of class criticism and discussion. The teacher in charge of the class meets the students from time to time for personal consultation.

English 2—Oral Expression

All groups, 2nd semester. 2 periods, 2 hrs. credit.

This course is designed primarily to insure (1) a good teaching voice and (2) effective address with facility and ease in oral expression.

English 23—The Teaching of English

Group II, 3rd semester. 3 periods, 3 hrs. credit.

This course aims to help the teachers of intermediate grades in their efforts to equip their pupils with clear, concise, forceful English. Such problems will be considered as unfavorable environment, the correction of poor English by the substitution of good, a wisely critical attitude of eye and ear, an early development of appreciation of good English, and the best methods of lesson preparation and presentation. Stress should be laid upon the importance of this subject so that children may realize at this period the handicap they will suffer in later life if unable to express themselves clearly and effectively.

English 13—The Teaching of Primary Reading

Group I, 2nd semester. 3 periods, 3 hrs. credit.

The primary aim of this course is to enable the student to acquire skill in the teaching of reading to beginners including the development of skill in the use of phonics. The course includes a comparison of the principal methods of teaching reading and the historical development of various methods of teaching reading are traced. Consideration is given to the psychological processes involved in reading. The student acquires familiarity with the means of measuring efficiency in reading. This course is accompanied with observations of primary reading classes as well as the actual teaching of reading.

English 43—The Teaching of Reading

Group IV, 3rd semester. 3 periods, 3 hrs. credit.

The aim of this course is to enable the student to acquire skill in the teaching of reading to beginners and the handling of the technique of silent reading with older pupils. Attention is given to the development of skill in the use of phonics. Consideration is given to the psychological processes involved in reading. The

student acquires familiarity with the means of measuring efficiency in oral and silent reading. The course includes a comparison of the principal methods of teaching reading and is accompanied with observations of oral and silent reading classes as well as the actual teaching of such classes.

English 14—Children's Literature and Story Telling

Groups I and IV, 4th semester. 3 periods, 3 hrs. credit.

This course involves the collection and study of literature in verse and prose suited to children of this age. The selections are studied for the purpose of finding the elements contained therein that are likely to appeal strongly to children. The study of folk tales and fairy stories is included in this course.

The course in story telling covers the principles involved in telling stories to children. It involves also the application of the principles of child psychology and voice training to the telling of stories.

English 24—Juvenile Literature

Group II, 4th semester. 3 periods, 3 hrs. credit.

This course is planned to give a foundation for teaching literature to pupils of the intermediate grades.

It aims to give an adequate knowledge of those literary types that are most suitable for children of this age. Magazines and current literature are studied and selections made from courses as well as from standard authors.

A study is made of the difficulties that children meet in their effort to comprehend thought from the printed page.

MATHEMATICS

Mathematics 22—The Teaching of Arithmetic

Group II, 2nd semester. 3 periods, 3 hrs. credit.

This course aims to develop a systematic presentation of the facts and principles of arithmetic with special emphasis upon the topics that are most significant in the work of the intermediate grades. The treatment illustrates at every step the most effective methods of teaching arithmetic. Attention is given to the results of the recent experiments in the psychological processes involved in the teaching of arithmetic and to the measurement of efficiency in this subject by the standard tests and scales. Observation of the teaching of arithmetic in the intermediate grades is an essential part of the course.

Mathematics 42—The Teaching of Arithmetic

Group IV, 2nd semester. 3 periods, 3 hrs. credit.

This course aims to present a systematic study of the topics in arithmetic that are found in the course of study of the rural school. A special effort is made to have students understand how to use the resources of the country in supplying opportunities for the application of arithmetic. Attention is given to the psychology of arithmetic and to the standard measurements in this subject. Observation is an essential part of the course.

SCIENCE**Science 1—Nature Study**

All groups, 1st semester. 3 periods, 2 hrs. credit.

The word nature study is used in a broad sense to cover all phases of elementary science adapted to all groups. This course aims to give the student a definite body of knowledge of common forms of environmental materials and to supply the principles that will guide him in selecting and using environmental materials wherever he may be located. The course includes as wide a range of observation as possible of materials which the prospective teacher may be called upon to use in his work. Field trips are supplemented by laboratory study. For teachers of the upper grades a differentiation is made in favor of materials that supply the basis for further scientific study, especially in the field of biology.

Science 22, 42—The Teaching of Geography

Groups II, and IV, 2nd semester. 3 periods, 3 hrs. credit.

This is a general course in geography given from the standpoint of man's reaction to his environment and aims to coordinate fundamental principles of geography. The course is developed from the viewpoint of causal relations rather than the mere enumeration of facts and principles. As far as time permits some study is made of regional geography as a type of further application. Students get training in the organization and the presentation of geographic data through the use of the project and problem method; in the preparation and the use of maps, graphs, diagrams, and other illustrative material; and in the problems and methods involved in teaching field geography. Students are made familiar with the use of standard educational measurements in geography. The observation of classes in the teaching of geography is a necessary part of the course. Such differentiation in the application of the above principles and methods is made for the different groups as the course of study in geography requires.

Science 44—Agriculture

Group IV, 4th semester. 3 periods, 3 hrs. credit.

A large purpose of this course is to give to the teachers of rural schools an insight into and a sympathy with the basic industry of the rural population and to appreciate the larger aspects of this industry as related to our national welfare. The rural teacher is instructed how to relate a knowledge of agriculture to the experiences of rural children with a view to motivating the teaching of the common branches. Opportunity is offered for participation in agricultural projects so that teachers can initiate and supervise projects with their pupils. Through this course teachers come in touch with the leaders of agricultural improvement and learn of the available sources of information on agricultural subjects.

SOCIAL STUDIES**Social Studies 22—The Teaching of History**

Group II, 2nd semester. 3 periods, 3 hrs. credit.

This course includes a study of such history as will equip students to teach the history of the intermediate grades as recommended by the state course of study. Observation of teaching in these grades is a feature of the course.

Attention is given to teaching civics in the intermediate grades. The course for the fourth and fifth grades centers around the idea of community cooperation emphasizing those who furnish us food, clothing, shelter, medical aid, light, transportation, protection, etc. The work for the sixth grade centers around the idea of industrial cooperation with emphasis upon vocational opportunities, study of community service through occupations, and the qualifications required for each occupation.

Social Studies 42—The Teaching of History

Group IV, 2nd semester. 3 periods, 3 hrs. credit.

This is a composite course in the teaching of history and civics using as a basis the report of the Committee of Eight of the American Historical Association and bulletin No. 23, 1915, of the United States Bureau of Education entitled "The Teaching of Community Civics." Special emphasis is laid upon the opportunities for citizenship in rural communities and upon the ultimate dependence which all civilization has upon the products of the soil. This course aims to develop resourcefulness in the student in the use of available text and reference books.

Social Studies 44—Rural Sociology

Group IV, 4th semester. 3 periods, 3 hrs. credit.

The primary aim of this course is the inculcation in the minds of the students of a love for and a just appreciation of the importance of a healthy country life, and includes consideration of such topics as: defects of present day country life, treated constructively; the lack of rural pride and rural cooperation; land tenantry; migration from the country to the city and its causes; cooperative buying and selling; the need for scientific agriculture; the country home; the country church; good roads; and the country school as an agent in intellectualizing, socializing and spiritualizing country life. This course also includes rural school problems.

Social Studies 14: 24: 34

Groups, I, II, III, 4th semester. 3 periods, 3 hrs. credit.

EDUCATIONAL SOCIOLOGY.—This course provides a general survey of society as now organized, by carefully studying its various groups and the agencies most effective in determining its present status. The school, as a prime factor in this development, is discussed both as to its genesis, its past significance, and its increasing opportunities for future service. This will naturally include studies of the relation of education to the state and democracy in general, in-

roducing the present social attitude toward discipline, the curriculum, and method, and the social opportunities of the school in vocational training and guidance.

ARTS

Arts 1—Drawing

All groups, 1st semester. 3 periods, 1½ hrs. credit.

The aim of this course is to enable students to teach the public school course of study in drawing including the representation of common objects, the elementary principles of design, lettering, composition, and color harmony in their application to dress, home, school, and community interests; to give students facility and confidence in their ability to draw and illustrate on the blackboard a wide range of school subjects; to develop appreciation of art and ability to teach pupils the appreciation of art, including the study of pictures. Such differentiation is made in this course for the different groups as the course of study requires including the teaching of the elements of mechanical drawing for the upper grades.

Arts 1.2: 23: 24—Handwriting

Groups I, II, IV, 2nd semester. 2 periods, 1 hr. credit.

At the beginning of this course the handwriting of students is measured by one of the handwriting scales and if they fall below the standard set for teachers they are put in special classes for practice. The time of this course is devoted largely to methods of teaching writing and to developing skill in blackboard writing. Students are instructed in the results of the recent investigations in the psychology of writing. Through measuring their own handwriting and the handwriting of children, students become acquainted with the use of handwriting scales.

Arts 2.2—Handwork

Group 1, 2nd semester. 4 periods, 2 hrs. credit.

This course aims to instruct students in the use of various materials that will enable them to work out simple problems as they arise out of the daily necessities of food, clothing and shelter. Students learn to appreciate the problems that are within the interests of children and how such problems may be graded according to the child's control of technique. The course includes clay modeling, paper and cardboard construction and simple problems in wood and textiles. Students observe demonstrations of this work in the training school and participate in such work.

Arts 14, 24, 44—Art Education

Groups, I, II, IV, 4th semester. 4 periods, 3 hrs. credit.

"I raise a voice for far superber themes for poets
and for art,

To exalt the present and the real,
To teach the average man the glory of his daily walks
and trade."

—Walt Whitman.

Art education does not exist for the purpose of training children to make pictures, but to embrace the idea of beauty and finer workmanship in all phases of life. It develops a general appreciation of the most suitable, the most useful and therefore the most beautiful. It aims to meet the real practical needs on one hand and the cultural on the other, and makes it possible for every child to grow up to love beauty and to express it, even in most common walks in life.

"Art for Life's Sake," taught by interested, enthusiastic teachers, will open up a new, more beautiful, happier world to thousands of American boys and girls, and eventually to thousands of homes.

Arts 2—Music

All groups, 1st semester. 2 periods, 1 hr. credit.

Groups, I, II, IV, 2nd semester. 2 periods, 1 hr. credit.

Groups, I, II, IV, 4th semester. 2 periods, 1 hr. credit.

This course presupposes a knowledge of the elements of music. The purpose of this course is to fit students to teach music in the public schools. The salient features of this course are: a treatment of the child voice, a study of the tonal and rhythmic problems of each grade, ear training, melody writing, sight reading, and part singing, a study of the song material adapted to each grade, the use of the phonograph to develop musical appreciation, and the development of musical programs. Students are taught how to apply the standard musical tests to discover musical talent. Observation and practice teaching are a requirement of the course.

HEALTH EDUCATION

Health 1.1—Personal and School Hygiene

All groups, 1st semester. 2 periods, 2 hrs. credit.

PERSONAL HYGIENE. The aim of this course is to secure in the students settled habits in the care of the body which will lead to stronger, healthier and more efficient lives. The course aims to have students understand the hygiene of posture, nutrition, clothing, exercise, fatigue, rest and sleep; the causes of ill health and disease together with their control and prevention. Only those facts of physiology and anatomy which have special significance for hygiene are considered. The instructor will hold personal conferences with students as a part of the course.

SCHOOL HYGIENE. The aim of this course is to equip the student with the knowledge of school and child hygiene necessary for a teacher. The following topics are included: normal growth and its standards; the ill effects of malnutrition, bad air, lack of exercise, excessive exercise, lack of proper rest, defective vision, defective hearing, adenoids, diseased tonsils; remedies for various defects and the best methods of treating them from the school standpoint; hygiene of program making; school sanitation including school furniture, ventilation, heating, lighting, water supply, toilets, etc.; regulations of state and local boards of health; the problem of nutrition as applied to school children with laboratory exercises in food values and food preparation. Observation of good hygienic school conditions and of good hygiene teaching is an important feature of this course.

Health 1.2—Health Education

All groups, 1st and 2nd semesters. 3 periods, 1½ hrs. credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching; rhythmic work, including clubs, wands, and folk dancing; games, athletics, including track and field events, tennis, hockey, hiking, skating, etc. Corrective work, including proper exercises for students unable to take regular gymnasium work.

One hour each semester—a graded course in health education, including physical exercises and games, arranged to meet the needs of children at various stages of development through the grades. Discussion of the different theories of play, and the management and equipment of playgrounds. First aid in emergencies is included.

Health 3, 4—Health Education

All groups, 3rd and 4th semesters. 3 periods, 1½ hrs. credit each semester.

Two hours each semester—Physical Education—floor work; apparatus; marching; rhythmic work, including clubs, wands and folk dancing; games; athletics, including track and field events, tennis, hockey, hiking, skating, etc. Corrective work including proper exercises for students unable to take regular gymnasium work.

One hour each semester—the graded course in health education for children continued. Demonstration lessons and student teaching. Athletic activities for use on playground. Physical examination of school children.

Social Hygiene—a part of the time of this course is devoted to a discussion of problems of heredity, environment, sex hygiene and eugenics.

ELECTIVES**Arithmetic, Biology, Geography, History**

All groups, 1st semester. 3 periods, 3 hrs. credit.

Inasmuch as many students enter Normal Schools, who during their high school course devoted their time and attention almost entirely to subjects of secondary grade and have naturally forgotten much that they were taught in earlier years, and inasmuch as the course of study adopted March 23, 1920, has been criticized as being of too professional a nature for the average high school graduate expecting to teach the so-called common school branches, it is considered the part of wisdom to offer a brief review in the most important elementary subjects of the public school curriculum. With this in mind a semester course is offered in the above named branches, emphasizing entirely the content of the subject. The student will thus refresh his memory and with a much better background should gain an organized, unified and correlated grasp of a subject that may have been studied fragmentarily and without proper correlation and perspective.

Electives, Major Group

Group III	{	2nd semester. 6 periods, 6 hrs. credit
		3rd semester. 3 periods, 3 hrs. credit
		4th semester. 6 periods, 6 hrs. credit

As the name indicates, the major group should comprise a field in which the student expects to specialize while pursuing studies of collegiate rank and in which he will engage as teacher. Such a field should be chosen as appears most serviceable and attractive from experience and observation; a field in which he may find full employment of all his powers both as student and teacher.

Minor Subjects

Group 111	{	2nd semester. 6 periods, 6 hrs. credit
		4th semester. 3 periods, 3 hrs. credit

Minor subjects are offered as electives in Group III in order that students may prepare in a field somewhat wider than that afforded by a single major group. Ordinarily majors and minors are of an allied nature.

As many students in Group 111 will teach in junior high schools and in high schools of the third class, it is very important that such teachers be equipped to handle the work of more than one department.

Student Body, 1920-21
